Dear Mr. Snow:  
Please consider this letter a response to CALFED.  
As a long-time user of our  
recreational rivers, I oppose CALFED's  
plan to raise existing dams or  
build new off-stream storage ~~reservoirs~~  
These would require massive diversions  
from the Sacramento River.

I urge CALFED to take measures  
to increase the efficiency of use  
of existing water supplies instead.  
This could be achieved by switching  
to more water efficient crops and  
drip irrigation.

I support CALFED's proposed water use  
goals for the central valley, including  
removing such facilities as the ~~new~~

211016

Engelhardt dam, that act as barriers  
to migrating salmon, acquiring important  
recreation habitat, and increasing instream  
flows for fish, wildlife, and recreation.

In general, we cannot solve our  
problems caused by dams and diversions  
by creating more of the same.

Sincerely,

Adam Stunk
